Summary

MCA graduate with a strong grip on the MERN stack. I build and ship real full-stack products — from AI-powered blogs to social media automation platforms. Comfortable working across the entire stack, integrating third-party APIs, and deploying to production. Looking for internship or full-time roles where I can contribute from day one.

Projects

Personal project | Remote

Full Stack Developer | 03/2026 - Present

- Built and deployed a **production-ready AI-powered social media automation platform** using MERN stack at social-media-scheduler-rust.vercel.app.
- Integrated **Google Gemini AI** for intelligent social media post generation with custom tone, style, and scheduling capabilities.
- Implemented **Hugging Face Stable Diffusion** for AI image generation with retry logic, timeout handling, and quality control.
- Developed cron job scheduler for automated multi-platform publishing to LinkedIn and Instagram using Zernio API.
- Utilized **Cloudinary** for media storage and **Multer** for secure file uploads with validation.
- Deployed frontend on Vercel and backend on Render with **MongoDB Atlas**, ensuring high availability and scalability.

Academic Productions | Patna, Bihar

Full Stack Developer | 08/2025 - 02/2026

- Developed a high-performance full-stack blog application using **MERN stack** (React.js, Node.js, Express.js & MongoDB) and deployed it on Vercel for seamless user experience.
- Integrated **Google Gemini AI API** for intelligent context-aware content generation, significantly reducing content creation time.
- Implemented **ImageKit API** middleware for real-time image optimization and compression, resulting in faster page loading speeds.
- Secured administrative backend routes using **JWT authentication** and role-based access control to ensure data security.
- Enforced referential integrity in MongoDB using cascading deletes and proper indexing for reliable and consistent data management. Developed a high-performance full-stack blog application using the MERN stack and deployed it via <https://quick-blog-omega-liard.vercel.app/>.

Skills

JavaScript(ES6+), TypeScript, Python, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs, Git, GitHub, Data Structures & Algorithms, Problem Solving, Linux

Education

Uttaranchal University | Dehradun, India

Master of Computer Applications | 02/2026

Successfully developed and deployed an '**AI-Enabled Full Stack Blog Application**' as the final MCA capstone project.

S.R.K. Goenka College | Sitamrhi, Bihar

Computer Applications | 09/2023

Built strong foundation in Object-Oriented Programming (OOPs), Database Management Systems (DBMS), and Web Development.
